Ms. Massenburg, I attended your public meeting April 23, 2003 in Elkhart. My compliments on your presentation and professionalism. My question is this: Our company Jason Industries was listed as a PRP for this site. The problem for us is that we were founded in 1972 in a small garage and had no operations that used chemicals or generated hazardous waste of any kind during the 1972-1976 time frame. Our waste (as conveyed to Susan Swales) was small amounts of clean cardboard, office garbage and mostly household types of waste. How do we get off this list? Can you refer me to someone in the legal department? Thank you, John Bline
